### EXPLANATORY NOTES

#### Introduction

The Digest contains the latest available figures at the time of issue for a selection of monthly and quarterly series. Where possible, series are shown both in their original and seasonally adjusted form.

#### Seasonal adjustment

Measures of variability and details of the methods used in seasonally adjusting Bureau statistics are given in Appendix D and C, respectively, of *Seasonally Adjusted Indicators* (1308.0). This annual publication also contains historical original and seasonally adjusted data in tabular and graphical form of a selection of the statistics appearing in the Bureau's monthly and quarterly publications.

As well as being adjusted for normal seasonal factors, some of the statistical series included in the Digest have been adjusted for the effects of calendar variations, namely, "trading-day" effects (arising from the varying numbers of Sundays, Mondays, Tuesdays, etc. in a month) and the influence of movable holidays, e.g. Easter and Australia Day.

Most of the original and seasonally adjusted series are subject to revision.

#### Related publications

More detailed information is available in the *Monthly Review of Business Statistics* (1304.0). Publications from which the series in the Digest are derived are listed in page 8.

All publications produced by the ABS are listed in *Catalogue of Publications* (1101.0) which is available free of charge from any ABS office.

#### Symbols and other usages

- r - figure or series revised since previous issue
- n.a. - not available.
- n.y.a. - not yet available.
- (where a line is drawn across a column between two consecutive figures) break in continuity of series

Where figures have been rounded, discrepancies may occur between sums of the component items and totals.
